

< Oracle VM VirtualBox Download >

1. <https://www.virtualbox.org/wiki/VirtualBox> 사이트 접속 후 **Download** 클릭

2. VirtualBox 최신버전 (6.1.26) 설치 > windows hosts 클릭

The screenshot shows the 'Download VirtualBox' page. On the left is a navigation menu with links: About, Screenshots, Downloads, Documentation (with sub-links for End-user docs and Technical docs), Contribute, and Community. The main content area is titled 'Download VirtualBox' and contains the following text: 'Here you will find links to VirtualBox binaries and its source code.' followed by a section 'VirtualBox binaries' with a disclaimer about license terms. It then provides links for the latest 6.0 and 5.2 packages. A box highlights the 'VirtualBox 6.1.26 platform packages' section, which contains a list of links: Windows hosts (highlighted with a red box), OS X hosts, Linux distributions, Solaris hosts, and Solaris 11 IPS hosts. Below this, it states the binaries are under GPL version 2, points to a changelog, and mentions checksum verification with a note about SHA256 being preferred over MD5. A final note recommends upgrading guest additions after upgrading VirtualBox.

Download VirtualBox

Here you will find links to VirtualBox binaries and its source code.

VirtualBox binaries

By downloading, you agree to the terms and conditions of the respective license.

If you're looking for the latest VirtualBox 6.0 packages, see [VirtualBox 6.0 builds](#). Please also use version 6.0 if you need to run VMs with software virtualization, as this has been discontinued in 6.1

If you're looking for the latest VirtualBox 5.2 packages, see [VirtualBox 5.2 builds](#). Please also use version 5.2 if you still need support for 32-bit hosts, as this has been discontinued in 6.0. Version 5

VirtualBox 6.1.26 platform packages

- [Windows hosts](#)
- [OS X hosts](#)
- [Linux distributions](#)
- [Solaris hosts](#)
- [Solaris 11 IPS hosts](#)

The binaries are released under the terms of the GPL version 2.

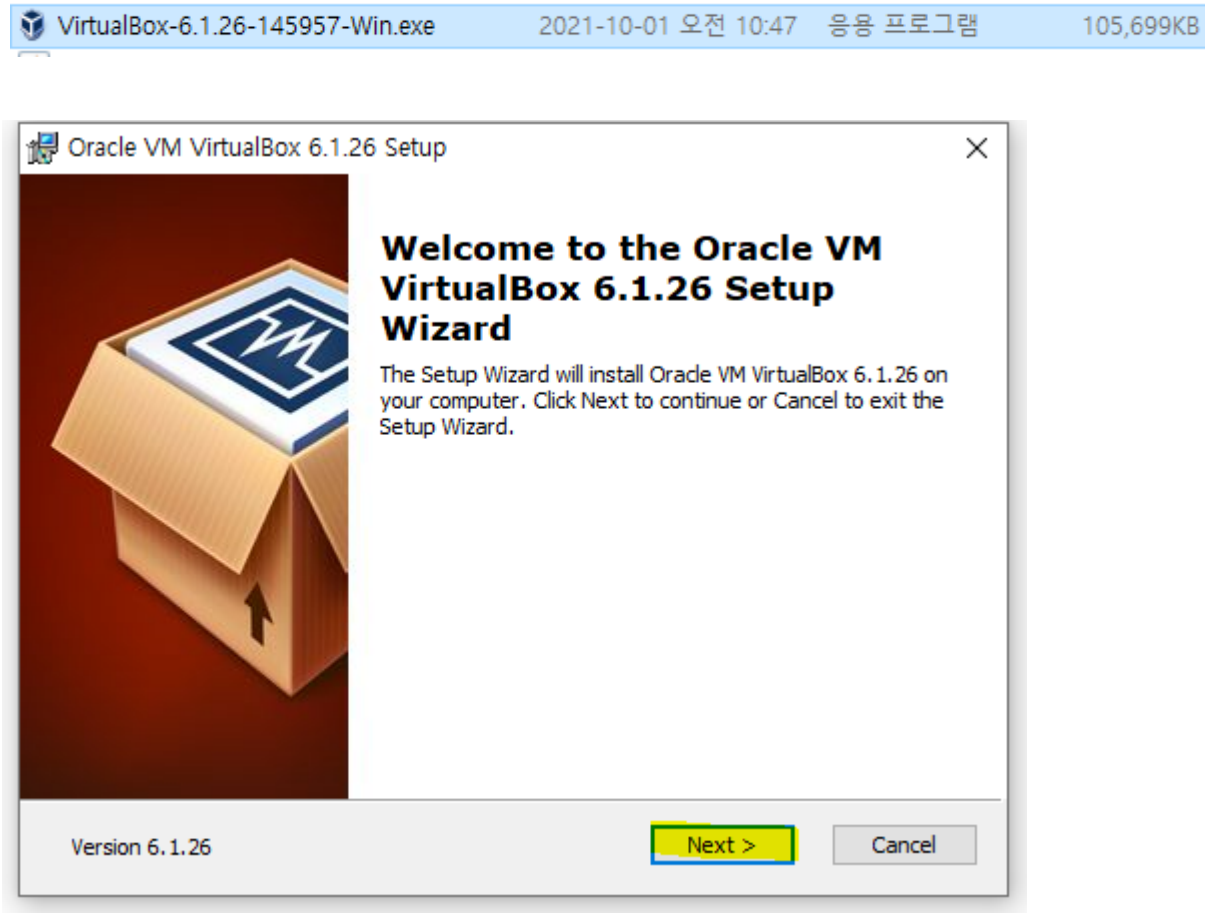

See the [changelog](#) for what has changed.

You might want to compare the checksums to verify the integrity of downloaded packages. *The SHA256 checksums should be favored as the MD5 algorithm must be treated as insecure!*

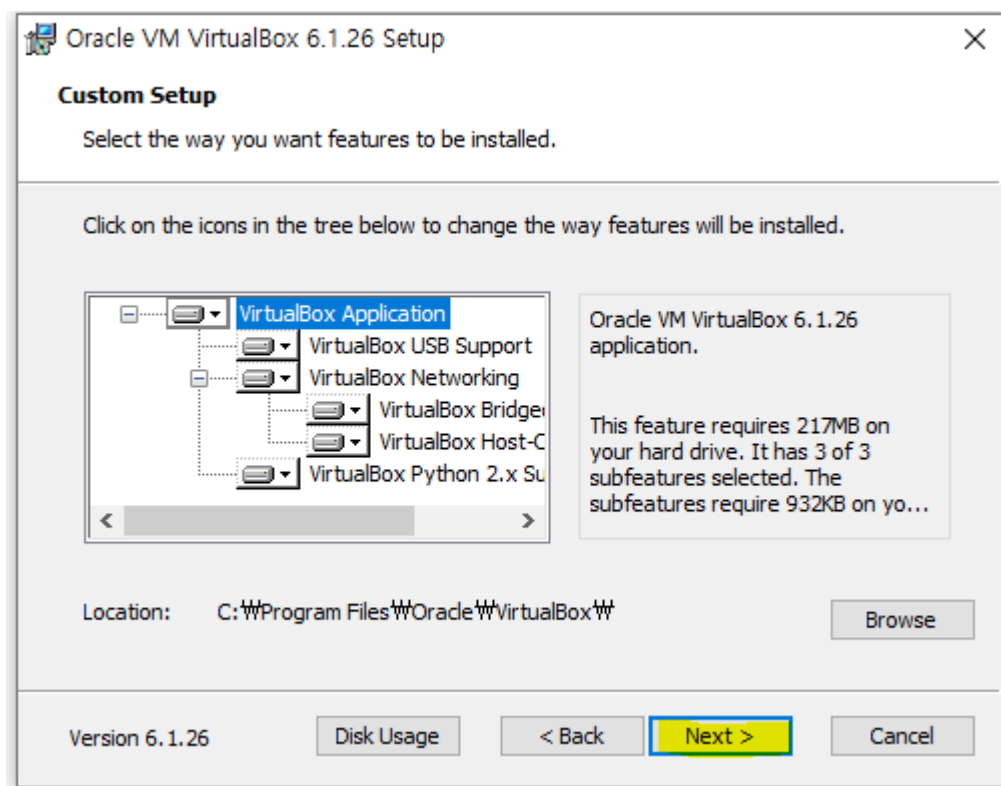

- [SHA256 checksums](#), [MD5 checksums](#)

Note: After upgrading VirtualBox it is recommended to upgrade the guest additions as well

3. .exe실행파일 클릭 후 다운로드 시작 > Next 클릭

4. 'Next' 클릭 > 'Next' 클릭

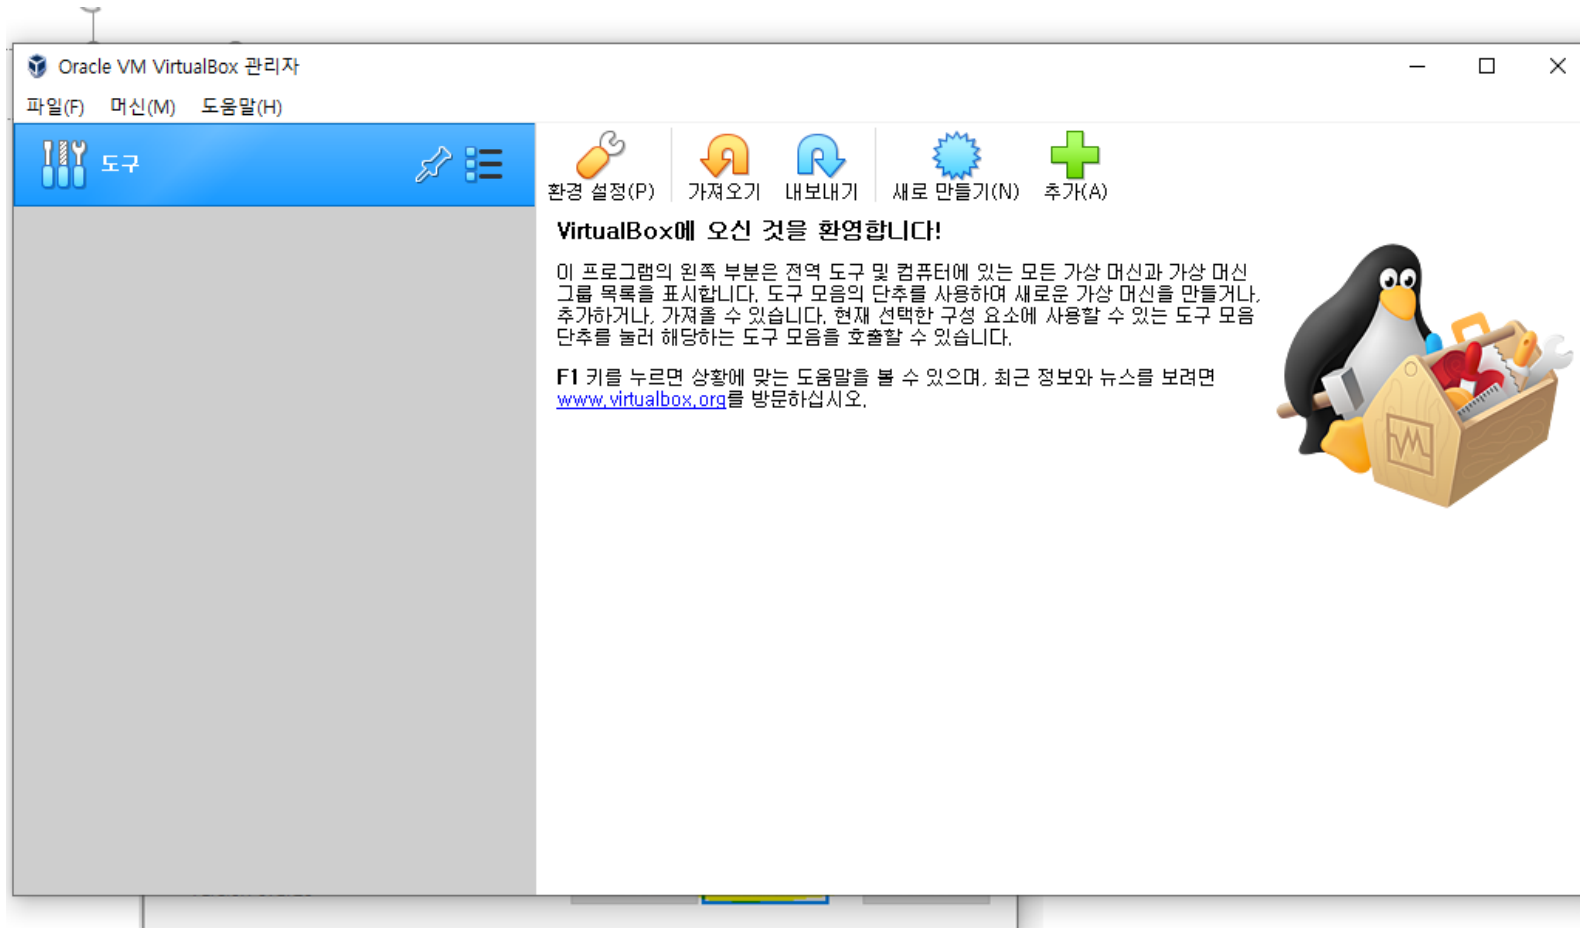

5. 'Yes' 클릭 후 'Install' 클릭

6. 설치 완료

7. 설치 확인

8. VirtualBox 6.1.26 Oracle VM VirtualBox Extension Pack 확장패키지 다운로드

VirtualBox 6.1.26 Oracle VM VirtualBox Extension Pack

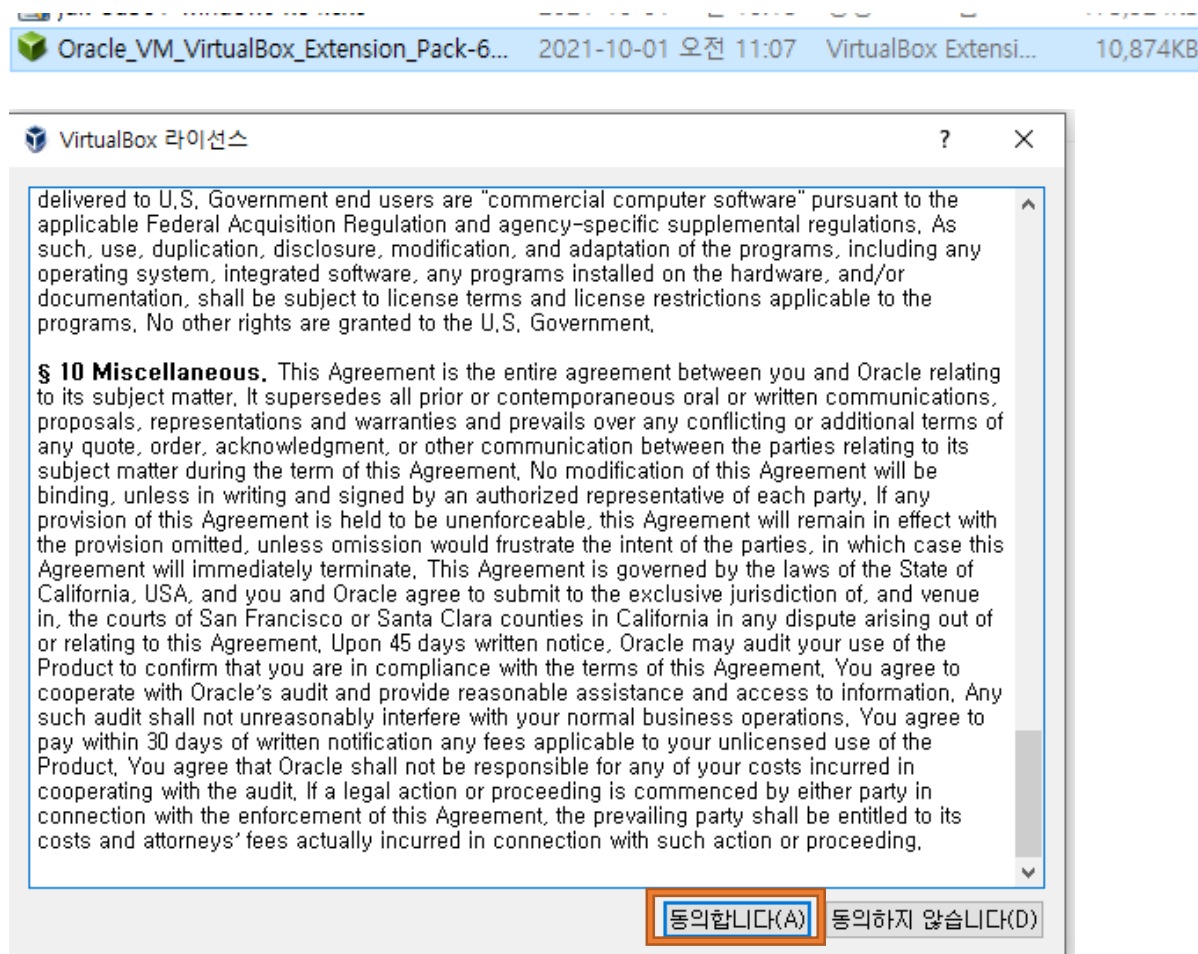

- [All supported platforms](#)

Support for USB 2.0 and USB 3.0 devices, VirtualBox RDP, disk encryption, NVMe and PXE boot for Intel cards. See [this chapter from the User Manual](#) for an introduction to this Extension Pack. The Extension Pack binaries are released under the [VirtualBox Personal Use and Evaluation License \(PUEL\)](#). Please install the same version extension pack as your installed version of VirtualBox.

VirtualBox 6.1.26 Software Developer Kit (SDK)
